PROFILE

Enthusiastic and driven Software Engineering undergraduate with a solid foundation in programming and problem-solving. Skilled in building mobile and web applications using modern technologies, with hands-on experience in full-stack project development and team collaboration. Published researcher (ICACT 2024) with a passion for developing innovative, research-driven solutions that address real-world challenges.

EDUCATION

University of Plymouth (via NSBM Green University) BSc. (Hons) Software Engineering	2023 – Present
Information Technology and Distance Learning Hub Certificate Course in Computer Application	2023
Mahamaya Girls' School, Nugegoda G.C.E. Advanced Level – Physical Science	2022

RESEARCH & PUBLICATIONS

Enhancing Security with Biometric and Heart Rate Data Integration Published and presented at ICACT 2024 (International Conference on Advanced Communication Technology). Explored integration of biometric and heart rate data to strengthen real-world security systems.	2024
--	------

TECHNICAL SKILLS

Software Development: SDLC, Agile methodologies, version control with Git
Web Technologies: HTML, CSS, JavaScript, PHP, Laravel
Front-End Frameworks: React.js, Vite, Three.js, React Three Fiber, Tailwind CSS
Mobile Development: Flutter, Dart
Back-End & APIs: Node.js, Express.js, Socket.io, REST APIs
Databases: MySQL, MongoDB, Firebase, SQLite
Tools & Platforms: VS Code, Figma, GIT, MS Office
Programming Languages: Java, Python, JavaScript, C, C#, SQL, Dart

PROJECTS

EMEXA – Emotion-Aware MCQ Assessment System (Final Year Research Project)
Technology Stack: React.js, Node.js, Express.js, MongoDB, Socket.io, Hugging Face (emotion model), Groq LLaMA 3.3 70B, Google Gemini API, Cloudinary, Brevo

- Full-stack web application integrating real-time facial emotion recognition with adaptive Socratic hint delivery for MCQ-based assessments.
- Features include burnout detection, gamification, K-Means clustering (built from scratch in JavaScript) for final mark prediction, peer comparison, and a Parent Dashboard.
- Delivers personalised learning support by dynamically adjusting hints based on detected student emotional state during assessments.

Green Events – University Event Management System (Group Project)

Technology Stack: React.js, Vite, Node.js, Express.js, MongoDB, Mongoose, Socket.io, Multer, JWT, bcryptjs

- Full-stack web application for managing events at NSBM Green University, supporting event creation, registration, and real-time notifications.
- Implements secure user authentication, file/image uploads, and 3D visual elements using Three.js.

RoomPilot – Interactive Furniture Layout Visualizer (HCI Project)

Technology Stack: React.js, Vite, Three.js, React Three Fiber, React Konva, Tailwind CSS, Zustand, Node.js, Express.js, SQLite, JWT, bcryptjs

- Interactive web application for a furniture shop allowing customers to visualise furniture placements in living rooms, kitchens, and bedrooms.
- Supports both 2D canvas-based layout (React Konva) and immersive 3D room views (React Three Fiber / Three.js).

Safe Serve – Food Safety Audit Web Application

Technology Stack: PHP, MySQL, HTML, CSS

- Digital platform for Public Health Inspectors to conduct food safety audits and generate hotel ratings.

Lumi Smart – Smart Lighting Control System

Technology Stack: JavaScript, Node.js, Firebase

- Web application for efficient energy management and smart lighting automation.

Team Sync – Remote Team Collaboration Mobile App

Technology Stack: Flutter, Firebase, Dart

- Mobile application enabling real-time task management and collaboration for remote teams.

Airlytics – Air Quality Analytics Dashboard

Technology Stack: Laravel, PHP, Chart.js, MySQL, HTML, CSS, JavaScript

- Data analytics dashboard for monitoring air quality and environmental metrics.

Smart POS – Point-of-Sale System

Technology Stack: PHP, MySQL, HTML, CSS, JavaScript

- Intuitive POS web application for retail businesses with inventory and billing management.

Filmor Cinema – Movie Ticket Booking Platform

Technology Stack: PHP, HTML, CSS, MySQL, JavaScript

- Movie ticket booking and seat reservation platform for cinemas.

Aura Serene – Wellness Appointment Booking System

Technology Stack: PHP, MySQL, HTML, CSS

- Therapy and wellness appointment booking system for mental health professionals.

Garage Management System

Technology Stack: PHP, MySQL, C#

- All-in-one solution for managing garage operations including vehicle tracking and service history.

OTHER SKILLS

- Strong problem-solving and analytical thinking abilities.
- Effective team collaboration and communication skills.
- Understanding of programming concepts, algorithms, and data structures.
- Ability to quickly learn new languages and technologies.
- Creative thinking and UI/UX awareness through Figma design work.

CONTRIBUTIONS BEYOND ACADEMICS

Vice President – Students' Wellbeing Association, NSBM Green University 2026

Member – Dancing Club, NSBM Green University 2023 – Present

Volunteer – IEEE Student Branch, NSBM Circularity & Sustainability Community, Volunteer Club,
Mathematics & Statistics Circle, NSBM Green University 2023 – Present
